SOP - VirusTotal Threat Intelligence Automation Using n8n

Version 1.0

Objective
Automate VirusTotal reputation analysis and generate AI-powered email alerts.

Architecture
Schedule Trigger -> HTTP Request (VirusTotal) -> AI Agent -> Email Notification

Prerequisites
- n8n
- VirusTotal API Key
- Email Credential

Configuration Steps
1. Create a workflow named Threat Intelligence Automation.
2. Add Schedule Trigger (Daily 08:00 Asia/Yangon).
3. Add HTTP Request node.
URL: https://www.virustotal.com/api/v3/domains/microsoft.com
Header: x-apikey = YOUR_VIRUSTOTAL_API_KEY
4. Add AI Agent.
Analyze VirusTotal results and generate Domain, Reputation, Risk Level and Recommendations.
5. Add Gmail Email node.
Subject: VirusTotal Threat Intelligence Report
Body: AI Agent output.

Security Considerations
Do not publish API keys, email passwords, OAuth tokens or personal email addresses.

Sample Output
Threat Intelligence Report - Domain: microsoft.com - Risk Level: Low.
